Methods and Materials for Containment and Cleaning Up:

- Large Spills:** Stop the flow of material, if this is without risk. Soak up with inert absorbent material. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb with vermiculite, dry sand, or earth and place into containers. Clean contaminated surfaces thoroughly. Following product recovery, flush area with water.
- Small Spills:** Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.
- Never return spills in original containers for reuse. For waste disposal, see Section 13 of this SDS. Clean up spills immediately, observing precautions in Protective Equipment section. Sweep up and shovel into suitable containers for disposal.
- Environment Precautions:** Prevent further leakage or spillage if safe to do so. Prevent entry into waterways, sewers, basements, or confined areas.

SECTION 7: HANDLING AND STORAGE

- Handling:** Do not pressurize, cut, heat, or weld containers. Empty product containers may contain product residue. Do not store near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Exercise ordinary care in handling industrial lubricants. Avoid breathing vapors and mists. Do not take internally. Avoid contact with eyes, skins, and clothes. Wash hands thoroughly after use.
- Storage:** Store in a cool, well ventilated area away from heat, sparks, and flame. Keep away from heat or other sources of ignition. Keep containers closed when not in use. Keep out of reach of children. Keep in original container provided by manufacturer.
