**NEW PRODUCT**

**“Works Better”**

The smooth operating syringe for use in the irrigation of root canals, periodontal pockets and other surgical sites.

**“Lasts Longer”**

The strong polypropylene barrel will not warp and has a nonreflective outer shell to reduce glare and prevent eye fatigue.

**“Costs Less”**

Compare to The high cost brands on the market to see your savings.

## Irrigating Syringes

These non-sterile, multipurpose curved tip syringes can be used for endo irrigation, perio irrigation, surgical site irrigation or as an intraoral impression material delivery method. The strong body, graduation marks and 12mL curved tip combine to provide an ideal instrument for pressure irrigation and a host of other applications.
